# RaySafe i3 System Configurations

The RaySafe i3 is an active dosimetry system that provides real-time insights about radiation exposure, helping medical staff and physicians evaluate and take action to more effectively use all the radiation reduction solutions provided in the room. Especially suitable for interventional staff who have higher radiation exposure than most medical professions, because of scattered radiation.

Use the RaySafe i3 to easily observe, minimize, and manage radiation exposure without being distracted from the task at hand.

The RaySafe i3 system comes in two main configurations:

- RaySafe i3 with On-screen Display
- RaySafe i3 with Stand-alone Display

RaySafe i3 with On-screen Display: Real-time dose rate indication, shown on the X-ray System's main monitor.

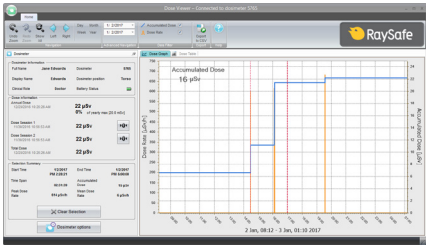

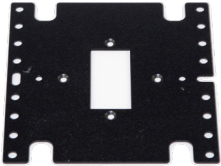

RaySafe i3 with Stand-alone Display: Real-time dose rate indication, shown on dedicated display unit.

# RaySafe i3 On-Screen Display System

RaySafe i3 On-Screen Display is targeted for different markets/radio frequencies. A system includes:

<p><b>RaySafe Real-time Hub</b></p> <p>Communicates with dosimeters within range. Collects data and makes it available for the RaySafe Video Unit, as well as the RaySafe Dose Manager Software. Can be accessed within the hospital network, via a web browser, to download stored dose data.</p>	
<p><b>RaySafe Video Unit</b></p> <p>Uses data from the RaySafe Real-time Hub to render the Real-time View, transmitted as a video signal (HDMI/DVI). The Real-time View is shown on the lab's main screen or on a separate display, and it shows dose rate for connected dosimeters in real time via green, yellow and red bars corresponding to each individual user.</p>	 
<p><b>RaySafe Real-time Reference Dosimeter</b></p> <p>Provides X-ray start/stop time stamps in order to synchronize measurements from multiple dosimeters. A reference dosimeter is required for displaying the history bars on the right side of the Real-time View.</p>	
<p><b>RaySafe Reference Dosimeter Holder</b></p> <p>Can be affixed to an exposed surface, e.g. a C-arm.</p>	

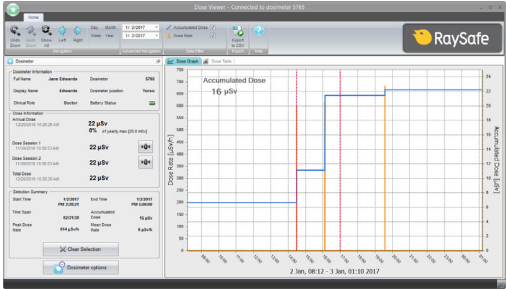

<p><b>RaySafe Dose Viewer Software*</b></p> <p>Easy-to-use software for administration of individual RaySafe i3 dosimeters. Shows dose history for the connected dosimeter.</p>	
<p><b>RaySafe Video Unit Wall Holder</b></p> <p>VESA 75 holder for wall mounting of video unit.</p>	
<p><b>Cables &amp; Power Supplies</b></p> <ul style="list-style-type: none"><li>• 3 m and 30 m Ethernet cable</li><li>• 2 m USB to micro-USB cable</li><li>• HDMI-DVI cable</li><li>• Power over Ethernet injector (for Real-time Hub)</li><li>• Video Unit power supply and power plugs</li></ul> <p>Power cable and extension cables according to region:</p> <ul style="list-style-type: none"><li>• Europe power cable</li><li>• US/Canada/Japan power cable</li><li>• Australia power cable</li><li>• UK power cable</li></ul>	

\* RaySafe Dose Manager software can be purchased separately, see page 10.

Part No / Model	RaySafe i3 On-screen Display Packages
<b>5293302</b>	<b>RaySafe i3 On-screen Display Package, 866.0 MHz</b>
	<i>India</i>
<b>5131252</b>	<b>RaySafe i3 On-screen Display Package, 868.3 MHz</b>
	<i>EU / EEA / CH: See list of countries on page 10.</i>
<b>5131265</b>	<b>RaySafe i3 On-screen Display Package, 918.3 MHz</b>
	<i>Canada &amp; USA</i>
<b>5131276</b>	<b>RaySafe i3 On-screen Display Package, 927.9 MHz</b>
	<i>Japan</i>

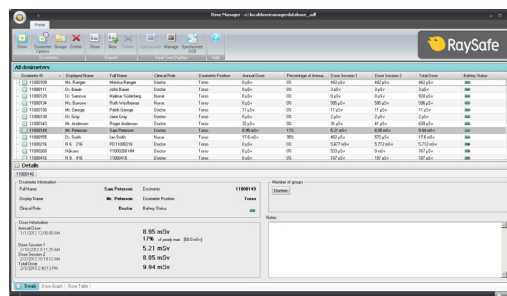

# RaySafe i3 Stand-alone Display System

The RaySafe i3 with stand-alone display can be ordered in packages with or without the RaySafe Dose Manager software, and targeted for different markets/radio frequencies. A system includes:

<p><b>RaySafe Real-time Display</b></p> <p>Touch screen that shows dose rate in real time for up to 8 dosimeters, and stores dose and dose rate for all dosimeters within range.</p>	
<p><b>Four RaySafe Real-time Dosimeters</b></p> <p>Personal dosimeter for instant wireless transfer of dose data. Measures dose and dose rate for every second. Stores dose rate per second for last hour of exposure and dose per hour for 5 years.</p>	
<p><b>RaySafe Dosimeter Rack for Five Dosimeters</b></p> <p>For storage of 5 dosimeters when not in use. Can be affixed to a wall.</p>	
<p><b>RaySafe Dose Viewer Software</b></p> <p>Easy-to-use software for administration of individual RaySafe i3 dosimeters. Shows dose history for the connected dosimeter.</p>	

**RaySafe Dose Manager Software (may be included depending on system option)**

Advanced software for analyzing, reporting and archiving dose information. Collects dose history for all dosimeters. Possibility to retrieve dose information from multiple real-time displays through the hospital network or via a USB memory. Includes tools for data analysis. It is also possible to export data for further analysis, e.g. in Excel.

## RaySafe Real-time Display Wall Holder

VESA 75 holder for wall mounting of real-time display.

## Cables & Power Supply

- Real-time Display power supply
- 2 m USB to micro-USB cable

Power cable according to region:

- Europe power cable
- US/Canada/Japan power cable
- Australia power cable
- UK power cable

In addition, one mounting bracket of choice (MCS, Mavig or GCX) is included in a RaySafe Stand-alone System delivery. See page 10.

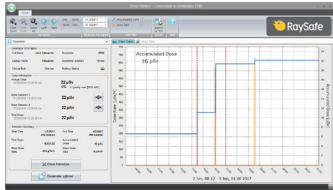

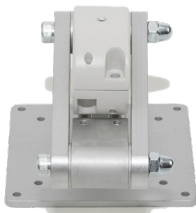

Part No / Model	RaySafe i3 Stand-alone Display Packages with RaySafe Dose Manager

	See page 6 for a description.	
	<i>Canada &amp; USA</i>	
5132180	<b>RaySafe i3 Real-time Dosimeter, 927.9 MHz</b>	
	See page 6 for a description.	
	<i>Japan</i>	
5304537	<b>RaySafe i3 Real-time Dosimeter Bundle, 866.0 MHz</b>	
	Set of four dosimeters. See page 6 for a description.	
	<i>India</i>	
5274858	<b>4xRaySafe i3 Real-time Dosimeter Bundle, 868.3 MHz</b>	
	Set of four dosimeters. See page 6 for a description.	
	<i>EU / EEA / CH: See list of countries on page 10.</i>	
5274873	<b>RaySafe i3 Real-time Dosimeter Bundle, 918.3 MHz</b>	
	Set of four dosimeters. See page 6 for a description.	
	<i>Canada &amp; USA</i>	
5274886	<b>RaySafe i3 Real-time Dosimeter Bundle, 927.9 MHz</b>	
	Set of four dosimeters. See page 6 for a description.	
	<i>Japan</i>	
4923927	<b>RaySafe Dosimeter Rack</b>	
	For storage of 5 dosimeters when not in use.	
	Can be affixed to a wall.	

Part No / Model		RaySafe i3 Accessories
4926891	<b>RaySafe Dose Viewer Software</b>	
	<p>Easy-to-use software for administration of individual RaySafe i3 dosimeters. Shows dose history for the connected dosimeter.</p> <p><i>Note: The latest version is required for i3 Real-time Dosimeters.</i></p>	
4926905	<b>RaySafe Dose Manager Software</b>	
	<p>Advanced software for analyzing, reporting and archiving dose information. Collects dose history for all dosimeters. Possibility to retrieve dose information from multiple real-time displays through the hospital network or via a USB memory. Includes tools for data analysis. It is also possible to export data for further analysis, e.g. in Excel.</p>	
4712128	<b>MCS Mounting Bracket</b>	
	One mounting bracket of choice (MCS, Mavig or GCX) is included in a RaySafe Stand-alone System delivery.	
4712414	<b>Mavig Mounting Bracket</b>	
	One mounting bracket of choice (MCS, Mavig or GCX) is included in a RaySafe Stand-alone System delivery.	
4712438	<b>GCX Mounting Bracket</b>	
	One mounting bracket of choice (MCS, Mavig or GCX) is included in a RaySafe Stand-alone System delivery.

# Specifications

Dosimeter	
<b>Dimensions</b>	40 x 58 x 17 mm (1.6 x 2.3 x 0.7 in.)
<b>Weight</b>	34 g (1.20 oz)
<b>Operational quantity</b>	$H_p(10)$
<b>Energy dependence</b>	< 25 % (N-series, 40 – 150 kV)
<b>Temperature dependence</b>	< 5 % (18 – 26 °C) < 25 % (15 – 18 °C, 26 – 35 °C)
<b>Response time</b>	< 1 s, above 100 $\mu\text{Sv/h}$ < 5 s, below 100 $\mu\text{Sv/h}$
<b>Integration interval</b>	1 s
<b>Detection limit</b>	< 30 $\mu\text{Sv/h}$
<b>Dose rate uncertainty (continuous radiation)</b>	10 % or 10 $\mu\text{Sv/h}$ (40 $\mu\text{Sv/h}$ – 150 mSv/h) 20 % (150 mSv/h – 300 mSv/h) 40 % (300 mSv/h – 500 mSv/h) The measured dose rate is monotonically increasing up to 1 Sv/h
<b>Dose reproducibility</b>	10 % or 1 $\mu\text{Sv}$
<b>Maximum lifetime dose</b>	10 Sv
<b>Battery</b>	CR2450 (replaceable, 1 – 2 years lifetime depending on usage)
<b>Communication</b>	See “Radio” section on page 12

Typical angular response (relative to 0°)

Typical energy response

Video Unit	
<b>Dimensions</b>	108 × 83 × 24 mm (4.3 × 3.3 × 0.9 in)
<b>Weight</b>	280 g (9.9 oz)
<b>Dose unit</b>	Sv or rem
<b>Power</b>	External supply
<b>Video output</b>	DVI digital output: 2x HDMI 1.4a up to 1920×1200 at 60 Hz
<b>Network</b>	10Base-T Ethernet (RJ45 connector)
Real-time Hub	
<b>Dimensions</b>	184 × 134 × 35 mm (11.8 × 9.8 × 2.4 in)
<b>Weight</b>	180 g (6.3 oz)
<b>Power</b>	Power over Ethernet
<b>Network</b>	10Base-T Ethernet (RJ45 connector)
<b>Communication</b>	See “Radio” section below.
Real-time Display	
<b>Dimensions</b>	300 × 250 × 60 mm (11.8 × 9.8 × 2.4 in)
<b>Weight</b>	1240 g (43.74 oz)
<b>Dose unit</b>	Sv or rem
<b>Display</b>	10.4” touch screen
<b>Interfaces</b>	Ethernet connection for Dose Manager. USB connection for synchronizing data to USB memory stick
<b>Power</b>	12 V DC, <1.5 A external power supply included
<b>Communication</b>	See “Radio” section below.
Radio	
<b>Frequency</b>	866.0 MHz, 868.3 MHz, 918.3 MHz or 927.9 MHz, depending on purchased configuration (see label on product)
<b>Transmitter power</b>	Dosimeter output: 3.2 mW Real-time Hub output: 1 mW Real-time Display output: 1 mW
<b>Communication range</b>	Typically 5 – 15 m, depending on the local environment
Software Requirements	
<b>Operating system</b>	Vista, 7, 8 or 10
<b>System memory</b>	At least 2 GB
<b>Storage</b>	At least 15 GB available space (Dose Manager)
